### All Studs & Track Adhere to SFIA Requirements

#### ABOUT PRIEFERT STEEL

Priefert Steel operates 5 slitter lines; 6 leveling and cut-to-length lines providing a range of blanked and cut-to-length sheets; as well as 3 flats/strip machines that allows us to level and edge condition strip for flat stock. Priefert Steel is currently producing high speed, edge-conditioned, roll-formed angle, and channel. Production also includes the operation of three tube mills that produce square, rectangle, and round tubing cut-to-length. With additional processing, Priefert can offer balled, notched, and swaged tubing. In addition to our core product line we also offer a full line of stud products that are manufactured in our Benton, Arkansas facility.
